Hi,

In SQL Developer you can comment a line or a block using "Source -> Toggle Line Comments" (Ctrl-Slash), but it would be nice to have a button that allows you to do it not only for line or block, but also for a part of a line.

Suppose I have the following block:

```
DBMS_OUTPUT.Put_Line('Hello World! How is it going today?');
IF mood = 'OK' AND weather = 'SUNNY' AND coffee_available
THEN
    DBMS_OUTPUT.Put_Line('Great!');
END IF;
```

The button would allow me to do something like:

```
/*DBMS_OUTPUT.Put_Line('Hello World! How is it going today?');
IF mood = 'OK' AND weather = 'SUNNY' AND coffee_available
THEN
    DBMS_OUTPUT.Put_Line('Great!');
END IF;*/
```

But also like:

```
DBMS_OUTPUT.Put_Line('Hello World! How is it going today?');
IF mood = 'OK' /*AND weather = 'SUNNY'*/ AND coffee_available
THEN
    DBMS_OUTPUT.Put_Line('Great!');
END IF;
```
